The area of the attic floor that is below [a plane that is seven (7') feet above the finished attic floor shall be included within Gross Floor Area, except as noted in (a) and (b) below, whether or not the attic area is accessible by pull-down stair, permanent stairs or can be accessed from an adjoining room. See Diagram No.2] **ceiling plane of seven (7') feet or more shall be included in the Gross Floor Area, and the area of the attic floor under a dormer that is below a ceiling plane of five (5) feet or more shall be included in the Gross Floor Area, subjected to the following:**

Section 6-5. DEFINITIONS

(a) As used in this Article:

(22.1) Floor Area, Gross for buildings in any residential zone shall include all interior areas between the interior surfaces of the perimeter walls of the building. No deductions shall be made for anything between the interior surfaces of the perimeter walls including, but not limited to, interior walls, staircases chimneys, mechanical spaces, structural elements and closets. In the event there is an open atrium space, the open area in the upper level or levels is not counted when calculating Gross Floor Area (GFA). (4/30/2002)

(A) With respect to the inclusion of Attic space within Gross Floor Area the following shall apply:

The area of the attic floor that is below [a plane that is seven (7') feet above the finished attic floor shall be included within Gross Floor Area, except as noted in (a) and (b) below, whether or not the attic area is accessible by pull-down stair, permanent stairs or can be accessed from an adjoining room. See Diagram No.2] ceiling **plane of seven (7') feet or more shall be included in the Gross Floor Area, and the area of the attic floor under a dormer that is below a ceiling plane of five (5) feet or more shall be included in the Gross Floor Area, subjected to the following:**

- (1) **If the total of the attic Gross Floor Area less than 50% of the Gross Floor Area of the floor below, the attic Gross Floor Area shall not be included in the Floor Area Ratio calculation.**
- (2) **Any attic floor area exceeding 50% to the floor below shall be included in the Floor Area Ratio calculation, unless it rendered uninhabitable through the use of engineered trusses or other required structural elements.**

See diagram No. 2.

- (a) Notwithstanding the foregoing, for buildings existing as to the effective date of this amendment, where the attic space has been solely accessible via “pull down” stairs or ceiling scuttle and the attic floor has not been included in the determination of the Gross Floor Area for purposes of calculating Floor Area Ratio, such floor area shall continue not to be included in the determination of Gross Floor Area for purposes of calculating Floor Area Ratio. If, any time after the effective date of this amendment, access to such attic space is made available via fixed stairs or through an adjacent room, the floor area of such attic space is made available via fixed stairs or through an adjacent room, the floor area of such attic space **in excess of 50% of the floor area of the floor next below** shall be included in the determination of Gross Floor Area as provided in Sec. 6-5(a)(22.1)(A) above.
- (b) For areas below dormers, whether individual or shed type dormers, which have a ceiling height of five (5) feet or more, such areas shall be included in the determination of Gross Floor **Area pursuant to Sec. 6-5(22.1)(A) above** for purposes of calculating Floor Area Ratio and Story as defined in Sec. 6-5(45). See Diagram No 2 (4/30/2002)

(B) With respect to the inclusion of Basement within Gross Floor Area, the following shall apply:

1. Where the finished surface of the floor above the basement is less than [three (3)] **five (5)** feet above the grade plane [and at all points the floor of the basement is more than four (4) feet below the grade plane,] the basement shall **not** be included in Gross Floor Area. See Diagram No. 3.
2. Where the finished surface of the floor above the basement is more than [three (3) feet and less than] five (5) feet above the grade plane, then 50% of the remaining space, after the exclusions stated below shall be included when calculating Gross Floor Area:
 - (a) Crawl spaces, space for parking, space for laundry equipment and space for building mechanical equipment shall not be included within Gross Floor Area. See Diagram No. 3.
 - (b) The following standards shall be applied in calculating the area to be excluded from Gross Floor Area:
 - 300 sq. ft. per vehicle, no tandem spaces permitted
 - 100 sq. ft. of space for laundry equipment
 - 100 sq. ft. of space for mechanical equipment
- [3. Where the finished surface of the floor above the basement is more than five (5) feet above the grade plane, then 1% of the space, excluding crawl space, shall be included when calculating Gross Floor Area. See Diagram No. 3 (4/19/2006)]

(45) Story shall mean that portion of a building above the basement, except as further defined in Sec. 6-5 (45.1), included between the upper surface of a floor and the upper surface of the floor or roof next above it. In the CGBR zone, that portion of

the building considered below grade shall also be defined as a “story” if it is habitable floor area used for other than storage, parking or mechanical space. A “half-story” is any space under the gable, hip or gambrel roof, the gross floor area of which, including dormers as described in Section 6-5 (22.1) (A) [1 (b),] does not exceed [forty (40)] **fifty (50)** percent of the floor area next below when measured at a plane seven feet zero inches (7’0”) above the floor directly below the roof. It shall be counted as a full story if the said [forty (40)] **fifty (50)** percent is exceeded. See Diagram No. 4. (4/30/2002)

- (45.1) Story Above Grade shall be any story having its finished floor surface entirely above the grade plane except that a basement shall be considered as a story above grade when the finished surface of the floor above the basement is:
- [1. More than five (5) feet above the grade plane; or]
 - [2.] **1.** More than five (5) feet above the finished grade at the wall of the building for more than [thirty (30)] **fifty (50)** percent of the total linear measurement of the perimeter wall of the building; or

In the event there is an open atrium space, the open area in the upper level or levels is not counted when calculating Gross Floor Area (GFA). (4/30/2002)

- (A) With respect to the inclusion of Attic space within Gross Floor Area the following shall apply:

The area of the attic floor that is below [a plane that is seven (7') feet above the finished attic floor shall be included within Gross Floor Area, except as noted in (a) and (b) below, whether or not the attic area is accessible by pull-down stair, permanent stairs or can be accessed from an adjoining room. See Diagram No.2] **ceiling plane of seven (7') feet or more shall be included in the Gross Floor Area, and the area of the attic floor under a dormer that is below a ceiling plane of five (5) feet or more shall be included in the Gross Floor Area, subjected to the following:**

- (1) **If the total of the attic Gross Floor Area less than 50% of the Gross Floor Area of the floor below, the attic Gross Floor Area shall not be included in the Floor Area Ratio calculation.**

See diagram No. 2.

- (a) Notwithstanding the foregoing, for buildings existing as to the effective date of this amendment, where the attic space has been solely accessible via “pull down” stairs or ceiling scuttle and the attic floor has not been included in the determination of the Gross Floor Area for purposes of calculating Floor Area Ratio, such floor area shall continue not to be included in the determination of Gross Floor Area for purposes of calculating Floor Area Ratio. If, any time after the effective date of this amendment, access to such attic space is made available via fixed stairs or through an adjacent room, the floor area of such attic space is made available via fixed stairs or through an adjacent room, the floor area of such attic space **in excess of 50% of the floor area of the floor next below** shall be included in the determination of Gross Floor Area as provided in Sec. 6-5(a)(22.1)(A) above.

See Diagram No. 3.
2. Where the finished surface of the floor above the basement is more than [three (3) feet and less than] five (5) feet above the grade plane, then 50% of the remaining space, after the exclusions stated below shall be included when calculating Gross Floor Area:

- 100 sq. ft. of space for laundry equipment
 - 100 sq. ft. of space for mechanical equipment
- [3. Where the finished surface of the floor above the basement is more than five (5) feet above the grade plane, then 1% of the space, excluding crawl space, shall be included when calculating Gross Floor Area. See Diagram No. 3 (4/19/2006)]
- (45) Story shall mean that portion of a building above the basement, except as further defined in Sec. 6-5 (45.1), included between the upper surface of a floor and the upper surface of the floor or roof next above it.
