2020 Indoor Baseball Clinic Boys Ages 7 - 10

ACTIVITY NUMBER: 40402

DESCRIPTION: 8-week indoor clinic: training on key fundamentals including hitting, throwing, and pitching.

REGISTRATION DATES:

- **Online: Monday, November 11** - online registration is only available to Greenwich residents. To register online go to www.greenwichct.gov/webtrac and select "Activities, Passes, Tickets."
- **Mail-in: Monday, November 25**- application should not be postmarked earlier than November 25.
- **In-person: Monday, December 9** at the Parks and Recreation Office. Non-residents may sign-up starting Monday, December 9.

Greenwich residents are required to provide proof of residency once per calendar year for all Parks and Recreation programs.

The primary family member is required to provide two current proofs of Greenwich residency. Family members participating in this program who are over 25 years of age require one current proof of Greenwich residency.

Acceptable proof documents with resident name, date and Greenwich address are as follows: Residential Lease; Utility bill (Gas, Electric, Water, Oil); Cable, Telephone, or Internet bill (not cell phone); Credit Card or Bank Statement (No Mortgage Statement); Driver's License or DMV CT State ID.

Family members participating in this program who are under 25 years of age, require a copy of their birth certificate, passport, or guardianship on file.

For non-residents, the primary family member as well as all participating family members who are over 25 years of age must provide identification and proof of address. Non-resident participants under 25 years of age, require a copy of birth certificate, passport or guardianship.

ELIGIBILITY: Boys ages 7 - 10 years old. **MUST** be 7 on or before April 30, 2020. Anyone turning 11 before April 30, 2020 is **NOT** eligible.

Department of Parks & Recreation - Recreation Division
 101 Field Point Road, Greenwich, CT 06836-2540
 Phone: 203-618-7649
 Email: Recreation@greenwichct.org

PARENT & ATHLETE CONCUSSION INFORMATION SHEET

WHAT IS A CONCUSSION?

A concussion is a type of traumatic brain injury that changes the way the brain normally works. A concussion is caused by a bump, blow, or jolt to the head or body that causes the head and brain to move quickly back and forth. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious.

WHAT ARE THE SIGNS AND SYMPTOMS OF CONCUSSION?

Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days or weeks after the injury.

If an athlete reports one or more symptoms of concussion after a bump, blow, or jolt to the head or body, s/he should be kept out of play the day of the injury. The athlete should only return to play with permission from a health care professional experienced in evaluating for concussion.

DID YOU KNOW?

- Most concussions occur without loss of consciousness.
- Athletes who have, at any point in their lives, had a concussion have an increased risk for another concussion.
- Young children and teens are more likely to get a concussion and take longer to recover than adults.

SYMPTOMS REPORTED BY ATHLETE:

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Sensitivity to light
- Sensitivity to noise
- Feeling sluggish, hazy, foggy, or groggy
- Concentration or memory problems
- Confusion
- Just not "feeling right" or is "feeling down"

SIGNS OBSERVED BY COACHING STAFF:

- Appears dazed or stunned
- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows mood, behavior, or personality changes
- Can't recall events prior to hit or fall
- Can't recall events after hit or fall

▶ **"IT'S BETTER TO MISS ONE GAME THAN THE WHOLE SEASON"**

CONCUSSION DANGER SIGNS

In rare cases, a dangerous blood clot may form on the brain in a person with a concussion and crowd the brain against the skull. An athlete should receive immediate medical attention if after a bump, blow, or jolt to the head or body s/he exhibits any of the following danger signs:

- One pupil larger than the other
- Is drowsy or cannot be awakened
- A headache that gets worse
- Weakness, numbness, or decreased coordination
- Repeated vomiting or nausea
- Slurred speech
- Convulsions or seizures
- Cannot recognize people or places
- Becomes increasingly confused, restless, or agitated
- Has unusual behavior
- Loses consciousness (even a brief loss of consciousness should be taken seriously)

WHAT SHOULD YOU DO IF YOU THINK YOUR ATHLETE HAS A CONCUSSION?

1. If you suspect that an athlete has a concussion, remove the athlete from play and seek medical attention. Do not try to judge the severity of the injury yourself. Keep the athlete out of play the day of the injury and until a health care professional, experienced in evaluating for concussion, says s/he is symptom-free and it's OK to return to play.
2. Rest is key to helping an athlete recover from a concussion. Exercising or activities that involve a lot of concentration, such as studying, working on the computer, and playing video games, may cause concussion symptoms to reappear or get worse. After a concussion, returning to sports and school is a gradual process that should be carefully managed and monitored by a health care professional.
3. Remember: Concussions affect people differently. While most athletes with a concussion recover quickly and fully, some will have symptoms that last for days, or even weeks. A more serious concussion can last for months or longer.

WHY SHOULD AN ATHLETE REPORT THEIR SYMPTOMS?

If an athlete has a concussion, his/her brain needs time to heal. While an athlete's brain is still healing, s/he is much more likely to have another concussion. Repeat concussions can increase the time it takes to recover. In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to their brain. They can even be fatal.
