

Updated for September 2016

State of Connecticut's Department of Energy and Environmental Protection

DEEP's website provides a good overview of the drought situation and links to other sites including some of those referenced below.

<http://www.ct.gov/waterstatus/site/default.asp>

National Oceanic and Atmospheric Administration (NOAA)

NOAA's National Weather Service is the federal agency responsible for national, state and local weather forecasts and advisories. The website is updated daily and has good information on the regional drought situation.
