ESTIMATED WATER DEMAND

Name of Project:__________________________________________________

Location: ________________________________________________________

Type of Project: □ Office □ Retail □ Restaurant
□ Multi-Family □ Single Family □ Subdivision

Water Source: □ Public Supply □ Private Well

Breakdown of Demand by Use:

Office: \( (20 \text{ GPD} \times \text{number of employees}) + \left(\frac{\text{usable square feet}}{150}\right) \) = ______________________

Retail: \( (10 \text{ GPD} \times \text{number of employees}) \times \left(\frac{\text{usable square feet}}{150}\right) \) = ______________________

Residential: \( (300 \text{ GPD} \times \text{number of families}) \) = ______________________

Restaurant: \( (30 \text{ GPD} \times \text{number of seats}) \) = ______________________

Total GPD ______________________

Verification that adequate water supply is available to serve proposed project as represented above.
