**Subject:** RE: 4 Little Cove Place info

Dear Jacalyn,

Thank you for your email and the attached wetland report. As stated by William Kenny, Soil Scientist, the southwestern corner of the property was examined on July 9, 2020. Per his determination, the area does not qualify as a tidal wetland. The tidal wetland boundary was set along the existing seawall. This report fully addresses my concern.

Please let me know should you have any questions.

Regards,

Hi Aleks – I hope you are well. The attached document came in from Bill Kenny regarding the wetlands at 4 Little Cove Place. The report notes that no inland wetlands or watercourses were observed at or within 100 of the property. If you want to update your comments that would be great... but I understand this is coming in late to you.
