

Greenwich Sustainability and Enhancement Committee – Guiding Principles

WE:

ACKNOWLEDGE our place as participants within living and interdependent ecosystems.

COMMIT to sustaining, improving and restoring our natural resources, landscape and watershed on which future generations will depend.

ENCOURAGE the growth and development that attends a healthy economy to be rooted in the health of our natural systems.

***HONOR** the natural function and beauty of our landscape as integral to building community and serving wellbeing.*

ENVISION collaboration among all members of our Greenwich community to forward responsible and enduring stewardship of water, air, land and shore.

RECOGNIZE a changing natural environment and seek resilient strategies to meet and adapt to inevitable challenges.

RESPECT diversity in all its forms: biodiversity in our landscapes, watershed and shore is what makes them resilient and diversity of representation in our process is what makes for successful outcomes.

Adopted: April 16, 2020
