Canopy Clearance
Sign should be positioned in the most visible sightlines for consumers entering the forecourt.

Align off column as first priority. If that location does not provide adequate visibility, move to a position that does.

Do not position Clearance sign under a Gulf word mark sign or Gulf disc sign. Follow rules established on this sheet

(2) Clearance signs are typically used per canopy. If more are needed, seek approval from Gulf reimage team

9'-8" is a min height to lower blade signs if obstructions above force blade signs down on column

Column blade signs are intended to be installed with best view from the cashier area.

Each column to be measured from the grade to the bottom of the blade.

Towel dispensers and old decals that are not approved by Gulf should be removed from canopy columns and given to the dealer/site management should they want to keep them OR disposed of in installer supplied dumpsters.

Fire extinguisher cabinets should be removed prior to painting the canopy columns and reinstalled after painting the columns.

Columns with Cladding will need special hardware for install.
