Re: 124 Old Mill Rd. water system definition.

Mr. Long,

The event space being constructed to host charitable and educational events will be on private property and the water supply from the existing residential water system. The Connecticut Department of Public Health Drinking Water Section definition were this to be a public system would be termed Transient Non-Community.

TNC System is defined as a non-residential water system that regularly serves 25 or more people, not necessarily the same people, on a daily basis for at least 60 days per year, such as food service establishments, gas stations, highway rest areas, state parks, youth camps, and private campgrounds.

There are no plans to have 25 or more people gathered at the event spaces exceeding 59 days according to the property owner Ms. Sternlicht.

Sincerely,

Ken Muller III
