Subject	Church Street Pre-Application for 192 Unit 8-30g Development

**Message** I am the owner and resident at 36 Church Street. I also own the open lot at 40 Church Street. I write to oppose this application for several reasons.

While I understand the proposal is 'immune' to traffic considerations given their application as an 8-30g development, I urge the board to bear in mind that Church Street is 32 feet wide not the normal 50 feet for streets in Greenwich. This along with the numerous multiple family dwellings and condominiums that already exist on Church Street contribute to congested traffic flow. There is also parking on one side of the street. So, if cars in opposing directions are on Church Street one must pull over to allow the other to pass safely.

We also have quite a bit of traffic to and from the hospital. Church Street and the surrounding streets are at capacity. Surely, there are so many other more suitable locations for a project of this scale.

Thank you for your consideration,  
Laura Novak  
36 Church Street
