Suggested Sources of Information on the Effectiveness of Proprietary Stormwater BMPs

- ETV: Performance data on specific stormwater BMPs can be found at <http://www.epa.gov/nrmrl/std/etv/vt-wqp.html#SWSATD>
- New York State verified stormwater management practices database can be found at: <http://www.dec.ny.gov/chemical/29089.html>
- New Jersey has a searchable database found at: <http://www.njcat.org/verification/Verifications.cfm>. The New Jersey DEP lists evaluated proprietary stormwater BMPs at <http://www.nj.gov/dep/stormwater/treatment.html>
- The University of Massachusetts Stormwater Technologies Clearinghouse can be found at <http://www.mastep.net/>
- Washington Department of Ecology evaluates emerging stormwater treatment technologies, more information and state approvals are found at <http://www.ecy.wa.gov/programs/wq/stormwater/newtech>. The Guidance for Evaluating Emerging Stormwater Treatment Technologies, Technology Assessment Protocol - Ecology (TAPE) protocol can be found at <http://www.ecy.wa.gov/biblio/0210037.html>
- CSTEVE: The University of New Hampshire (UNH) Stormwater Center is evaluating the performance of several stormwater control technology technologies real time and on the ground. Information can be found at <http://www.unh.edu/erg/cstev/>
- The American Society of Civil Engineers, EPA and others sponsor an international stormwater best management practices database at <http://www.stormwatercontroltechnologydatabase.org/>
- Center for Watershed Protection: This organization at <http://www.cwp.org/> provides resource information for local officials.
